Filed: November 14, 2003

Art Unit: 1745

For: HUMIDIFIER FOR FUEL CELL AND
PROCESS FOR WARMING THE SAME

Examiner: M. Ruthkosky

RESPONSE TO RESTRICTION REQUIREMENT

MS Amendment
Commissioner for Patents
P.O. Box 1450
Alexandria, VA 22313-1450

Dear Sir:

This is in response to the restriction requirement set forth in the Office Action mailed December 22, 2006 (Paper No. 20061220).

The Examiner has required restriction between the following inventions in the above-identified application:

Group I - encompassing claims 1-5, 7-12 and 15 drawn to humidifier (classified in Class 429, Subclass 34);

Group II - encompassing claims 6 and 16-20 drawn to method of warming a humidifier (classified in Class 429, Subclass 12); and

Group III - encompassing claims 13-14 which is drawn to a warming device for a fuel cell (classified in Class 429, Subclass 26).

Additionally, the Examiner asserts that Group I has three patentably distinct species:

Species I: claims 1-5,
Species II, claims 7-12, and
Species III: claim 15.

Application No.: 10/714,464

Docket No.: IIW-035

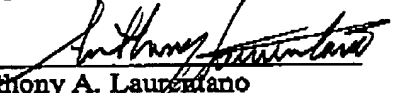

Accordingly, Applicants hereby elect Group I, claims 1-5, 7-12, and 15, and Species I, claims 1-5 for continued examination, with traverse.

The Commissioner may require restriction if two or more independent and distinct inventions are claimed in a single application (37 CFR 1.142(a)). In the present case, although the claimed subject matter may be classified in different classes, the inventions are not independent. Applicants respectfully assert that a single search of pertinent prior art would appear to suffice for all aspects of the invention. Specifically, the various Groups and Species appear to be so interrelated that a single examination would not appear to place a serious burden on the Examiner. Therefore, Applicant urges the Examiner to reconsider and withdraw the restriction requirement.

Accordingly, it is respectfully requested that the restriction requirement be withdrawn, and that all of the claims presently pending in this application be examined.

Dated: January 22, 2007

Respectfully submitted,

By 
Anthony A. Laupatano
